

360° Water Experience

Join us at [Wetsus](#) for an exciting adventure in the capital of water technology. If you're passionate about water, sustainability and innovation, this event is for you! Apply before November 20th, 2023.

📅 11 - 15 March 2024 (Week 11)

🕒 4 immersive days

📍 Leeuwarden, the Netherlands

📖 English minimum level required B2

€ Travel, lodging & activities fully covered

Apply now!

Why you should join

- **Immersive Learning:** Engage in site visits, expert-led sessions, workshops, and a real-life water technology challenge. Deepen your knowledge in various water tech areas.
- **Unique Insights:** Gain exclusive access to the Netherlands' innovative water technologies, sustainable practices, and research projects. Explore real-life case studies and stay updated on water treatment advancements.
- **Networking:** Connect with renowned academics, industry experts, and fellow European students. Expand your professional network and exchange ideas.
- **Career Opportunities:** Interact with leading water technology companies. Discover internships, research collaborations, and other career opportunities.

For who

Seeking second or third year bachelor students in (process) engineering, chemical engineering, environmental technology, and related fields.

How to apply

Submit your application by November 20th via: www.wetsus.nl/360°-water-technology-experience-application/.

Include CV, grades transcript and a motivation letter. Selected applicants will be notified by December 1st, 2023.
