**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Basic chemistry and chemical technology
2. General knowledge on environmental protection
3. Basic laboratory skills

**SUBJECT OBJECTIVES**

- C1 To provide students with a general knowledge of major agrochemicals classes and uses  
 C2 To provide student with a knowledge of agrochemical formulations, applications and management and disposal of wastes  
 C3 To provide students with a knowledge of the methods of analysis of agrochemicals

**SUBJECT EDUCATIONAL EFFECTS**

Relating to knowledge:

- PEK\_W01– trainees will have a general knowledge of the most important aspects of the chemistry and technology of agrochemical formulations  
 PEK\_W02 – student will have specialized knowledge about the of plant health products in the protection of food and fibre crops from weeds, insects and diseases  
 PEK\_W03 – student will have a basic knowledge of legislation/regulations associated with plant protection products

Relating to skills:

PEK\_U01 Trainees will be able to select and apply analytical methods to prepare and analyze residual agrochemicals present in water, plants and soil

PEK\_U02 Students will be capable of selecting chromatographic system for the analysis of specific agrochemicals, in particular, type of column and detector and of setting up optimal parameters of their running

<b>PROGRAMME CONTENT</b>		
<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1	Major agrochemical classes and uses: herbicides, insecticides, fungicides etc.	8
Lec 2	Formulation of agrochemicals: conventional and new-generation formulations, surfactants. Recent developments.	3
Lec 3	Packaging and application techniques for agrochemicals.	1
Lec 4	Waste management and disposal of agrochemicals.	2
Lec 5	Legislation and regulations. Regulatory requirements.	1
Total hours		15

<b>PROGRAMME CONTENT</b>		
<b>Form of classes - laboratory</b>		<b>Number of hours</b>
Lab 1	Introductory class. Safety rules and equipment inventory. Pre-lab assignments. Grading. Schedule.	2
Lab 2	Soxhlet extraction of contaminated soil.	4
Lab 3	Solid phase extraction of agrochemicals.	4
Lab 4	QuEChERS method to examine pesticide residues in food.	4
Lab 5	Identification of agrochemicals by spectroscopic methods.	4
Lab 6	Identification of agrochemicals by GC/FID.	4
Lab 7	Identification of agrochemicals by GC/ECD.	4
Lab 8	Identification of agrochemicals by GC/MS.	4
Total hours		<b>30</b>

<b>TEACHING TOOLS USED</b>
N1. Lectures with multimedia presentations
N2. Equipment for extraction processes, spectroscopic and chromatographic analyses

#### EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

<b>Evaluation</b> (F – forming (during semester), P – concluding (at semester end))	<b>Educational effect number</b>	<b>Way of evaluating educational effect achievement</b>

<p><b>PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES</b></p> <ol style="list-style-type: none"> <li>1. Basic theoretical knowledge in a field of analytical methods and techniques – spectroscopic and chromatographic.</li> <li>2. Basic theoretical and practical knowledge in a field of isolating various substances.</li> <li>3. Ability to use basic laboratory glassware and equipment and to apply the safety rules of work in a chemical laboratory.</li> <li>4. Fluency in performing chemical calculation.</li> </ol>
---

<b>SUBJECT OBJECTIVES</b>	
C1	To acquaint student with the basics of fine chemicals and REACH regulation.
C2	To acquaint student with the basics concerning fine chemicals, as well as the theoretical and practical aspects of good laboratory practice (GLP) and good manufacture practice (GMP).
C3	To acquaint student with advanced methods and techniques of quantitative and qualitative analysis (physical, chromatographic, chemical, electrochemical and spectroscopic) utilized in different branches of industry related to fine chemicals.
C4	To acquaint student with various techniques of preparing samples of different origin for the analysis.
C5	To acquaint student with practical aspects of selected analytical methods and techniques (physical, chromatographic, chemical, electrochemical and spectroscopic) utilized in different branches of industry related to fine chemicals.
C6	To acquaint student with an analytical equipment and instruments, as well as principles of its operation.

## ***SUBJECT EDUCATIONAL EFFECTS***

### **Relating to knowledge:**

Student, who has completed the course:

- PEK\_W01 gained the knowledge concerning fine chemicals and REACH regulation.
- PEK\_W02 gained theoretical knowledge concerning application of the good laboratory practice (GLP) and good manufacturing practice (GMP) in terms of fine chemicals.
- PEK\_W03 is familiar with basic definitions and types of errors, their causes and means of elimination in the quantitative analysis of fine chemicals.
- PEK\_W04 is familiar with definitions and approaches of analytical data quality objectives associated with validation, remediation, assessment, accuracy, precision, specificity and sensitivity of analytical methods and techniques, and the basics of their control.
- PEK\_W05 gained a wide knowledge in a field of various methods and techniques utilized in a qualitative and quantitative analysis (physical, chromatographic, chemical, electrochemical, spectroscopic) of fine chemicals in different industrial branches.
- PEK\_W06 is familiar with the construction of the laboratory equipment and instruments which are used in analytical methods of fine chemicals in different industrial branches and understands its operating principles.

### **Relating to skills:**

Student, who has completed the course:

- PEK\_U01 is able to apply principles of good laboratory practice (GLP).
- PEK\_U02 is able to apply various methods of isolation, extraction and separation of single components of the complex samples.
- PEK\_U03 is able to obtain an analytical sample in a proper manner, and prepare it to the various analytical processes.
- PEK\_U04 is able to select and apply appropriate analytical methods (physical, chromatographic, chemical, electrochemical, spectroscopic) to determine quality and purity of fine chemicals.
- PEK\_U05 is able to select and apply appropriate analytical methods (physical, chromatographic, chemical, electrochemical, spectroscopic) to perform quantitative analysis of fine chemicals.
- PEK\_U06 is able to select and operate appropriate laboratory equipment to perform instrumental analysis of fine chemicals.
- PEK\_U07 is able to prepare a report concerning performed experiments and obtained results, including their basic statistical analysis.

## **PROGRAMME CONTENT**

<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1	Introduction to fine chemicals and REACH regulation.	1
Lec 2	Analytical data quality objectives associated with GLP & GMP standards – validation, remediation, assessment, accuracy and precision.	1
Lec 3	General review of quantitative and qualitative analytical methods and techniques utilized in various branches of industry related to fine chemicals.	2
Lec 4	Analysis of active ingredient in different formulations, detection of its contaminations and chemical trace analysis.	2
Lec 5	Analytical methods and techniques used for food and food additives analysis.	2
Lec 6	Identification and testing of polymers, polymers additives, plastics and textiles.	2
Lec 7	Testing and analysis of coatings and thin films.	2
Lec 8	Physicochemical analysis of surfactants and other surface active agents.	2
Lec 9	Chemical analysis of colorants.	1
Total hours		<b>15</b>

<b>Form of classes - laboratory</b>		<b>Number of hours</b>
Lab 1	Introductory class: the terms of the subject and its crediting, safety rules, rules of the chemical laboratory in terms of selected aspects of GLP.	2
Lab 2	Characteristics of fatty substances in a food product	4
Lab 3	Determination and analysis of selected ingredients in a shampoo	4
Lab 4	Determination of a dye in a fabric	4
Lab 5	Identification and analysis of active substances isolated from plant material	4
Lab 6	Determination and analysis of food additives in a beverage	4

Lab 7	Estimation of vitamin content in a cosmetic product	4
Lab 8	Additional classes; consultations; credits.	4
	<b>Suma godzin</b>	<b>30</b>

<b>TEACHING TOOLS USED</b>	
N1	Multimedial presentation.
N2	Performing experiments with different laboratory equipment and instruments.
N3	Preparation of report including analysis and interpretation of obtained results.

<b>EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT</b>		
<b>Evaluation</b>	Educational effect number	Way of evaluating educational effect achievement

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Knowledge of physical chemistry: thermodynamics, kinetics.
2. Knowledge of mathematics: differentiation, integration, differential equations.

**SUBJECT OBJECTIVES**

- C1 Getting to know the equations kinetic of real processes.  
 C2 Getting to know the ideal reactor models.  
 C3 Learning basic concepts in reactor design and ideal reactor models.

**SUBJECT EDUCATIONAL EFFECTS**

relating to knowledge:

PEK\_W01 Student has a basic knowledge of kinetic equations of simple and complex reactions.

PEK\_W02 Student knows the basic models of ideal reactors.

PEK\_W03 Student has information about the simplest models of real reactors.

relating to skills:

PEK\_U01 Student is able to solve kinetic equations of simple reactions.

PEK\_U02 Student is able to prepare components balances (for ideal reactors) in a steady state system.

PEK\_U03 Student is able to solve design equations for ideal reactors.

**PROGRAMME CONTENT**

Form of classes - lecture	Number of hours
---------------------------	-----------------

Lec 1	The rate of chemical reaction. Definition of the reaction rate: elementary reaction, complex reaction. The dependence of rate on the concentration: first, second and third-order reactions. The elementary reaction rate constant. <i>Temperature dependence of rate constant. Dimension of rate constant. Determination of conversion. Dependence of conversion on concentration for reactions with different stoichiometry.</i>	2
Lec 2	The kinetic equation. Dependence of concentration (conversion) on time for the irreversible and reversible reactions of different order. The solution of the obtained differential equations.	2
Lec 3	BATCH. Ideal conditions. <i>Dependence of volume on concentration (conversion) and reaction time, first and second order reaction, unsteady-state.</i> CSTR. The assumption of perfect mixing. <i>Component continuity equation-product or substrate. The components of the balance equation.</i> The system's working conditions in steady-state, <i>dependence of reactor volume on concentration (conversion), the residence time.</i>	2
Lec 4	PFR. Ideal system, plug flow. The component balance. <i>Dependence of reactor volume on concentration (conversion) in steady-state, the residence time.</i>	2
Lec 5	Comparison of ideal reactors. Reactors' volume, volumetric flow rates, conversions. Graphic illustration.	2
Lec 6	The battery of reactors. Conversion in the first-order reaction case. Comparison of conversion in the battery of CSTRs and single CSTR. The battery of n-CSTRs and single PFR.	2
Lec 7	The real reactors models. Dynamic characteristics; model parameters, cellular model, model with longitudinal dispersion.	2
Lec 8	Final test	1
	Total hours	15
<b>Form of classes - project</b>		<b>Number of hours</b>
Proj 1	The kinetic equation; first, second and fractional-order reactions, the irreversible and reversible reactions. Conversion and concentration as a function of time.	2
Proj 2	The first (second)-order irreversible reaction in a BATCH. Determination of the reactor volume necessary to obtain specified daily product stream with a given conversion. Analysis of connection: volume-	2

	conversion- reaction time.	
Proj 3	Comparison of continuous reactors volumes (CSTR and PFR) - specific reaction order and volumetric flow rate, in a given conversion.	2
Proj 4	Comparison of conversion in a CSTR and a PFR - specific reaction order and volumetric flow rate, in a given volume.	2
Proj 5	Illustration the effect of using an excess of one of the reactants in second and third-order reaction. A CSTR and a PFR.	2
Proj 6	Comparison of conversion in the battery of CSTRs, single CSTR and single PFR.	2
Proj 7	Estimation of concentration in real chemical reactors assuming total segregation model, cellular model and model with longitudinal dispersion.	2
Proj 8	Final test	1
	Total hours	15

### TEACHING TOOLS USED

- N1. Lecture with multimedia presentation.  
 N2. Solving tasks and problems for elaborated project.  
 N3. Preparation and presentation of a project.

### EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Knowledge of operating system environment
2. Basic usage of spreadsheet software

**SUBJECT OBJECTIVES**

- C1 To familiarize students with storage of data in tables  
 C2 To familiarize students with relations between the tables and data  
 C3 Learning how to extract desired data from the tables

### SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

The person who passed the course

PEK\_W01 - has a basic knowledge of the form of data storage

PEK\_W02 - knows the existing relations between the data

PEK\_W03 - knows the most important databases in the field of chemical technology

relating to skills:

The person who passed the course

PEK\_U01 - is able to create the databases and tables and alter them according to the needs

PEK\_U02 - is able to extract the desired data from one or more tables

PEK\_U03 - is able to modify the data in the table in the specified locations

PEK\_U04 - is able to extract the data from existing chemical databases

### PROGRAMME CONTENT

Form of classes - laboratory		Number of hours
Lab 1	Databases: purpose and structure. Relations in databases. Database software.	2
Lab 2	Basic usage of SQL.	2
Lab 3	Creating and altering tables.	2
Lab 4	Queries: formulation, modification, analysis of the results.	2
Lab 5	Forms: creation, usage and modification.	2
Lab 6	Design and modification of reports. Structure of the reports. Printouts.	2
Lab 7	Programming of macros.	2
Lab 8	Relations between tables. Extracting data from multiple tables.	2
Lab 9	Integration with other software packages. Import and export of data.	2
Lab 10	PubChem database of chemical compounds.	2
Lab 11	Extraction and visualization of structures from Protein Data Bank	2
Lab 12	Searching the Catalysts and Catalyzed Reaction database	2
Lab 13	Searching the Database of Zeolite Structures	2
Lab 14	Searching scholar manuscripts online.	2
Lab 15	Credit	2
	Total hours	30

### TEACHING TOOLS USED

N1. Online chemistry databases

N2. SQL standard database package

N3. Spreadsheet

<b>SUBJECT OBJECTIVES</b>	
C1	Introducing students to investment project cycle from the stage of the initial idea until the plant is in operation.
C2	Presentation of issues relating to fundamental aspects of the pre-investment studies which allow to examining the project idea step by step and presentation of alternative solutions.
C3	To gain knowledge on the identification of investment opportunities include general and specific opportunities studies ready to present for potential investors.
C4	Understanding the nature and role of the preliminary assessment of the investment idea in the form of a pre-feasibility study.
C5	Presentation of the different stages of a feasibility study needed to make investment decisions and formulate the final version of the technical and economic project.
C6	To gain knowledge of product marketing, providing the necessary material inputs, locating the plant at the optimal site and human resource, technical and organizational planning.
C7	Knowledge of the financial viability of the project, planning the structure of overhead costs and the planning and balancing of project realization.

<b><i>SUBJECT EDUCATIONAL EFFECTS</i></b>	
<b>Relating to knowledge:</b>	
The person who passed subject:	
PEK_W01 – knows the investment project cycle from the stage of the initial idea until the plant is in operation and understands the interrelationship between three distinct phases: the pre-investment, the investment and the operational phase.	
PEK_W02 – has knowledge and is able to describe the stages of pre-investment phase includes identification of investment opportunities (opportunity studies), analysis of project alternatives and preliminary project selection as well as project preparation (prefeasibility and feasibility studies).	
PEK_W03 – has knowledge about identifying investment opportunities based on area, industrial sector and resource-based studies and specific project opportunity studies which should follow the initial identification of general investment opportunities.	

PEK\_W04 – knows the key concepts and issues related to the pre-feasibility study taking into account a detailed analysis of variants in the following main fields (components) of the study: project or corporate strategies, market and marketing concept, raw materials and factory supplies, location, site and environment, engineering and technology, organization and overhead costs, human resources, labour costs, project implementation schedule and budgeting.

PEK\_W05 – has knowledge of the individual stages of a feasibility study taking into account the market analysis, outline of marketing concept, identification and description of the location, including ecological and environmental impact, a description of the socio-economic and cultural environment, characteristics of raw materials and other inputs needed for operating the plant.

PEK\_W06 – is able to develop the functional and physical layout for the industrial plant, production program, is able to determine the production capacity of the plant and corresponding investment expenditures as well as the costs arising during the operational phase.

PEK\_W07 – knows how and is able to plan the organization needed to manage and direct all activities of the plant and create a structure of overhead costs.

PEK\_W08 – knows how and is able to specify implementation schedule and budget of project as well as describe the characteristics of the main implementation work tasks as well as the major constraints that normally have a particular impact on project implementation.

PEK\_W09 – knows the basic aspects of financial analysis of industrial project investment and has knowledge of evaluation concept.

PROGRAMME CONTENT		
Form of classes - project		Number of hours
Proj 1	<i>The investment project cycle: the pre-investment, the investment and the operational chase and promotion of industrial investment projects</i>	2
Proj 2	<i>Basic aspects of pre-investment studies</i>	2
Proj 3	<i>General and specific project opportunity studies</i>	2
Proj 4	<i>Pre-feasibility studies</i>	2

Proj 5	<i>The feasibility study - project background and basic idea</i>	2
Proj 6	<i>The feasibility study – market analysis and marketing concept</i>	2
Proj 7	<i>The feasibility study – raw materials and supplies, location, site and environment</i>	2
Proj 8	<i>The feasibility study – engineering and technology</i>	2
Proj 9	<i>The feasibility study – organization and overhead costs</i>	2
Proj 10	<i>The feasibility study – human resources</i>	2
Proj 11	<i>The feasibility study – implementation planning and budgeting</i>	2
Proj 12	<i>The feasibility study – financial analysis and investment appraisal</i>	2
Proj 13	<i>Presentation of the feasibility study for selected industrial process</i>	2
Proj 14	<i>Presentation of the feasibility study for selected industrial process</i>	2
Proj 15	<i>Presentation of the feasibility study for selected industrial process</i>	2
	Total hours	<b>30</b>

<b>TEACHING TOOLS USED</b>	
N1	lecture with a multimedia presentation
N2	individual preparation and multimedia presentation

<b>EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT</b>		
<b>Evaluation</b> F – forming (during semester), C – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
F1 (Project)	PEK_W01- PEK_W09	Elaboration + multimedia presentation of the feasibility study for selected industrial process

<b>Subject code</b>		<b>TCC024009</b>			
<b>Group of courses</b>		TAK / NIE*			
	<b>Lecture</b>	<b>Classes</b>	<b>Laboratory</b>	<b>Project</b>	<b>Seminar</b>
Number of hours of organized classes in University (ZZU)	30		30		
Number of hours of total student workload (CNPS)	90		90		
Form of crediting	Examination		Crediting with grade		
For group of courses mark (X) final course	X				
Number of ECTS points	3		3		
including number of ECTS points for practical (P) classes			3		
including number of ECTS points for direct teacher-student contact (BK) classes	1		1		

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER  
COMPETENCES**

1. English proficiency at level B2.
2. Principles of organic, inorganic and physical chemistry at the I<sup>st</sup> level studies.
3. Basic laboratory skills: use of laboratory apparatus and volumetric glassware, preparation of solutions.

<b>SUBJECT OBJECTIVES</b>	
C1	Gaining knowledge on chemical and physical properties of specialty surfactants and disperse systems.
C2	Familiarizing with classification and application of surfactants including the fine chemical products.
C3	Gaining of knowledge on fabrication technologies and physicochemical characterization and stability of emulsion formulations.
C4	Broadening of knowledge concerning influence of surfactants on phenomena at the interface.
C5	Gaining knowledge on the physicochemistry of the dispersed systems.
C6	Gaining new knowledge on achievements in fabrication and physicochemical characterization of materials for bio-medical applications.
C7	Gaining practical skills on physicochemical characterization of the emulsion and colloids.

***SUBJECT EDUCATIONAL EFFECTS***

**Relating to knowledge:**

Student, who has completed the course:

PEK\_W01 - Can define the dispersion systems, including the colloids, which are used in many fields of novel chemical technology.

PEK\_W02 - Has knowledge about the structure and classification of surfactants used in technology of disperse systems.

PEK\_W03 - Has knowledge on the basics of technological process design to obtaining the emulsion formulations with specific utilities.

PEK_W04 - Has knowledge on physico-chemical methods for testing the stability and performance of the dispersed systems
PEK_W05 - Knows the basis for the assessment and analysis of phenomena occurring at the interface, with particular emphasis on adsorption processes, reduce surface tension and detergenci.
PEK_W06 - Understands the issues describing kinetic, electrochemical and optical properties of the dispersed systems
PEK_W07 - Knows examples of the novel organic and inorganic technologies utilizing the dispersions and colloids
<b>Relating to skills:</b>
Student, who has completed the course:
PEK_K01 - Can plan, conduct and control preparation of chemically and physically stable dispersions with the desired properties and morphology.
PEK_K02 - Can evaluate the basic parameters of physico-chemical processes of aggregation, running at interfaces.

<b>PROGRAMME CONTENT</b>		
<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1	Introduction to disperse systems, general issues	2
Lec 2	Classification and application of surfactants. Self-assembly behaviour of surfactants - micellization, critical micelle concentration, hydrophilic-lipophilic balance	2
Lec 3	Emulsions – physicochemistry, technology and applications	2
Lec 4	Nanoemulsions – physicochemistry, technology and applications	2
Lec 5	Microemulsions – physicochemistry, technology and applications	2
Lec 6	Multiple emulsions – physicochemistry, technology and applications	2
Lec 7	Physicochemical methods evaluation of emulsions stability and morphology	2
Lec 8	Disperse systems in drug delivery	2
Lec 9	Surface tension - measurement techniques, the impact of surfactants, Langmuir-Blodgett films	2
Lec 10	Surface phenomena: adhesion, cohesion, wettability, interfacial adsorption	2

Lec 11	Foaming and detergency	2
Lec 12	Molecular-kinetic properties: Brownian motion, diffusion, sedimentation, osmosis, viscosity	2
Lec 13	DLVO theory - the interaction between colloidal particles, the stability of the dispersions and aggregation processes	2
Lec 14	Optical properties of dispersion systems - the Tyndall effect	2
Lec 15	The properties of colloidal nanoparticles solutions	2
	Total hours	<b>30</b>

<b>Form of classes - laboratory</b>		Number of hours
Lab 1	Introduction. Presentation of laboratory room. Acquaintance with health and safety (HS) regulations. Division into groups.	2
Lab 2	Emulsions - preparation and stability	4
Lab 3	Microemulsions – construction of a pseudoternary-phase diagram	4
Lab 4	Determination of the critical micelle concentration (CMC) value for ionic surfactants	4
Lab 5	Foaming and wettability of surfactants	4
Lab 6	Determining the weight of the polymer random coil	4
Lab 7	Rating phenomenon of coagulation	4
Lab 8	Evaluation of Tyndall effect in dispersion systems	4
	Total hours	<b>30</b>

<b>TEACHING TOOLS USED</b>
N1. Lecture with multimedia presentation.
N2. Examination with multiple choice test.
N3. Simple experiments for individual preparation of the dispersion and the measurement of their physicochemical properties, performed in the prepared to this purpose teaching laboratory.
N4. Elaboration of results of the conducted experiments in the form of a written report.
N5. Written or oral test of knowledge regarding carried out experiments

<b>EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT</b>		
<b>Evaluation</b> F – forming (during semester), P – concluding (at semester end)	Educational effect number	Way of evaluating educational effect achievement
P1 (lecture)	PEK_W01 – PEK_W06	Final examination
F1-7 (laboratory)	PEK_U01, PEK_U02	Oral or written evaluation of the theoretical preparation for laboratory classes (7 marks)
F8-14 (laboratory)	PEK_U01 – PEK_U02	Evaluation of the report from the performed experiments (7 experiments)
<b>P2 (laboratory) = 2/3((F1+F7)/7)+1/3((F8+F14)/7)</b>

### Prerequisites

1. Course of general chemistry
2. Completed courses for basic inorganic and organic technologies
3. Completed basic course on chemical engineering

#### 4. Ability for teamwork

##### **Goals**

C1 Presentation of backgrounds for environmental management and protection

C2 Presentation of problems related to pollution of atmosphere, water and soil, and methods for their prevention/mitigation

C3 Presentation of international legislation, environment policy in EU and Poland, European directives in environment protection

C4 Principles of environment protection, rules of sustainable development, administration of natural resources

##### ***Subject educational effects***

###### **Knowledge:**

PEK\_W01 student knows the concepts of environment protection

PEK\_W02 student recognizes the sources of atmosphere, water and soil contaminations

PEK\_W03 student is familiar with techniques used for decrease of industry impact

PEK\_W04 student knows problems related to sustainable development of chemical industry

###### **Skill:**

PEK\_U01 student knows the benefits of the use of membrane techniques

PEK\_U02 student is familiar with sorption processes and can select the proper material

PEK\_U03 student recognizes integrated and hybrid processes and can design them

PEK\_U04 student is familiar with ion-exchange processes and materials used in clean and cleaning technologies

###### **Social:**

PEK\_K01 Student can work in team and solve the problems collectively

<b>Program</b>		
<b>Lecture</b>		<b>No of hours</b>
Wy1	<b>Introduction</b> Definitions and terms used in environment protection engineering. Natural resources and rational their exploitation, Renewable resources, EU policy in environment protection.	2
Wy2	<b>Sustainable ecology.</b> Effect of mankind on environment, Ecological catastrophes and their impact on environment, Prevention of contaminants spreading, Sustainable development, Strategy and policy in ecology	2
Wy3	<b>Atmosphere conservation.</b> Air pollutants, Characterization of sources of air pollution, Warming effect, Methods of air protection ,	2
Wy4	<b>Water conservation.</b> Shortage of water, Water pollutants, Industrial waste water and municipal sewage, Quality of water, Surface and brackish water, Methods of water protection	2
Wy5	<b>Soil conservation .</b> Soil pollutants, Quality of soil, Hazard for soil degradation, Methods of re-cultivation.	2
Wy6	<b>Waste management.</b> Definition, Waste classification, Methods for disposal and utilization of wastes, Industrial and municipal wastes, Dangerous wastes,	2
Wy7	<b>Chemical industry and its impact to environment.</b> Technological advancement of large and SME industrial plants in Poland and in EU, Clean and cleaning technologies, Concept of zero discharge technologies, Trends in development in new technologies.	2
Wy8	<b>Sumary and colloquium</b>	1
	<b>Totally</b>	<b>15</b>

<b>Laboratory</b>		<b>No of hours</b>
La1	Introduction to laboratory: rules	2
La2	Diffusion dialysis in recovery of acids from hydrometallurgy wastes	4
La3	Membrane methods in removal of organic pollutants from water	4
La4	Adsorption for removal of organic pollutants from water	4
La5	Ion exchange processes in water treatment	4
La6	Herbicides and endocrine disruptors removal by active carbons	4
La7	Micellar enhanced ultrafiltration in water treatment processes	4
La8	Hybrid systems in removal of harmful ions from aqueous systems	4
	<b>Totally</b>	<b>30</b>

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Biological background at academic level.
2. Basic microbiology knowledge.

**SUBJECT OBJECTIVES**

- C1 The understanding the specificity of biotechnological process.  
 C2 The procurement of basic knowledge about industrially relevant microorganism.  
 C3 The knowledge about typical commercial products obtained in bioprocesses.

**SUBJECT EDUCATIONAL EFFECTS**

relating to knowledge:

Student who passed the exam:

- PEK\_W01 can characterize biotechnological process  
 PEK\_W02 can describe bioprocesses for the production of different consumer goods  
 PEK\_W03 know the application of biocatalysis in industry  
 PEK\_W04 know the application of biotechnological processes for the environment protection  
 PEK\_W05 has a knowledge about agrobiotechnology

**PROGRAMME CONTENT**

<b>Form of classes - lecture</b>	<b>Number of hours</b>
----------------------------------	------------------------

Lec 1	<b>Introduction</b> – Biotechnology: definition and history. Colors of biotechnology, Basic characteristic of biotechnological process. The sources of microbes for industrial applications.	2
Lec 2	<b>Biotechnological process:</b> fermentation resulted in metabolite <i>versus</i> fermentation resulted in biomass. Various end-products of bioprocesses.	2
Lec 3	<b>Biotechnological process: biotransformation:</b> biocatalyst characteristic, different approaches of biocatalysts preparation and modification	2
Lec 4	<b>Biotechnological process: biotransformation:</b> ways of biocatalysts preparation and modification, environment of bioreaction. Perspectives and new trends.	2
Lec 5	<b>Industrial application of biotransformation.</b>	2
Lec 6	<b>Industrial application of biotransformation.</b>	2
Lec 7	<b>Biotechnological production of amino acids.</b>	2
Lec 8	<b>Enzymatic preparations used for food processing.</b> HFCS production process.	2
Lec 9	<b>Food biotechnology:</b> dairy products	2
Lec 10	<b>Food biotechnology:</b> brewing	2
Lec 11	<b>Biotechnological production of organic acids.</b> Different methods of citric acid production. The importance of citric acid for industry.	2
Lec 12	<b>Biotechnological production of organic acids:</b> acetic acid, itaconic acid, gluconic acid	2
Lec 13	<b>Agrobiotechnology.</b> Perspectives and new trends. Genetically modified plants – the application and importance.	2
Lec 14	<b>Agrobiotechnology.</b> Bioinsecticides ( <i>Bacillus thuringensis</i> , entomopathogenic fungi, baculoviruses)	2
Lec 15	<b>Biotechnology for environment protection.</b> Biological methods of wastewater treatment. Bioremediation techniques. Phytoremediation.	2
	Total hours	30

<b>PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES</b>	
5.	Theoretical and practical knowledge required for the degree program being studied
6.	

<b>SUBJECT OBJECTIVES</b>	
C1	Get to know the basic methodology of scientific work
C2	Acquisition of the ability to use the scientific literature and other sources of knowledge.
C3	Increasing knowledge in a specialized field being studied

<b><i>SUBJECT EDUCATIONAL EFFECTS</i></b>	
<b>Relating to knowledge:</b>	
Student:	
PEK_W01 – knows the types of sources of scientific knowledge and expertise,	
<b>PEK_W02</b> - has in-depth knowledge in the area of the thesis topics.	
Student:	
<b>Relating to skills:</b>	
PEK_U01 – able to collect and verify the information useful to know a particular issue,	
PEK_U02 – can combine and generalize information from different sources,	
PEK_U03 – able in a concise and critical to develop the information collected,	

<b>PROGRAMME CONTENT</b>
--------------------------

<b>Form of classes - laboratory</b>		<b>Number of hours</b>
La 1-15	Individual student's work according to the schedule agreed with the thesis supervisor.	60

### PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. The knowledge in the field of basic inorganic and organic chemistry
2. The knowledge in the field of biochemistry

### SUBJECT OBJECTIVES

- C1 To familiarize students with the functioning and principles of green chemistry  
 C2 Obtaining basic knowledge of the methods and reactions used in green chemistry  
 C3 To acquire basic knowledge about the latest achievements in the field of green chemistry

### SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

- PEK\_W01 – knows the basic concepts and definitions in the field of green chemistry  
 PEK\_W02 – knows basic processes in Green Chemistry  
 PEK\_W03 – has basic knowledge of experimental methods and processes used in green chemistry  
 PEK\_W04 – knows the basic aspects of bioremediation and the use of green chemistry in environmental protection

PEK\_W05 – has knowledge about renewable energy and biorefineries  
 PEK\_W06 – knows the rules for the use of natural products in green chemistry

### PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction to green chemistry.	2
Lec 2	Catalysts for green chemistry and their applications in technological processes	6
Lec 3	Frontiers in benign chemical synthesis and processes	4
Lec 4	Renewable feedstocks and bioraffineries	2
Lec 5	Green analytical chemistry	2
Lec 6	Bioremediation	4
Lec 7	Green reactions in organic chemistry	4
Lec 8	Natural products in green chemistry	4
Lec 5	Exam	2
	Total hours	30

### TEACHING TOOLS USED

N1. Lecture with multimedia presentation.

### EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end))	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	PEK_W01- PEK_W06	Exam

### PRIMARY AND SECONDARY LITERATURE

**PRIMARY LITERATURE:**

Green Chemistry: Theory and Practice, Anastas P.T., Warner J.C.

**SECONDARY LITERATURE:**

[1] Biochemistry, Stryer

[2] Any book or basic organic chemistry

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Completion of Calculus I, Algebra I
2. Ability to use computer.

**SUBJECT OBJECTIVES**

C1	To understand application of statistical modeling in chemical experiment.
C2	To learn application of numerical implementation of statistical and optimization methods in control of chemical process.
C3	To understand mathematical apparatus of various problems related with design and analysis of the experiment.
C4	To learn how to process experimental data using statistical using numerical packages.

**SUBJECT EDUCATIONAL EFFECTS**

The range of skills:

The person who completed the course:

PEK\_W01 – is able to process experimental data and empirical observations and understand the role of statistical and mathematical methods in its description,

PEK\_W02 - is able to relate physical and chemical problem with appropriate mathematical problem and method to solve it

PEK\_W03 – has a scope of knowledge of mathematics and computer science to describe and interpret natural phenomena is able to process them using mathematical and statistical methods, is able to calculate a level of correlation between data and fit appropriate model, is able to solve set of linear, nonlinear and differential equations,

PEK\_W04 – using appropriate numerical method and numerical packages MATLAB, Excel and Origin is able to solve given mathematical problem with given accuracy

With a range of social skills:

The person who completed the course:

PEK\_K01 – understand the need of self-education using appropriate scientific and technical literature.

**PROGRAMME CONTENT**

<b>Form of classes - laboratory</b>		<b>Number of hours</b>
Le1	Solving sets of linear equations, matrix equations, inverse matrix, Gauss algorithm: case studies using MATLAB.	2
Le2	Solving sets of nonlinear equations, solution location, Newton-	2

	Raphson method: case study using MATLAB.	
Le3	Solving sets differentials equations, Euler method, Verlet method, explicit and implicit scheme: case study using MATLAB	2
Le4	Linear regression – least squares method, correlation coefficient, sum of squares, error: case study using MATLAB and Excel	2
Le5	Nonlinear regression, linearization, normal equation, Gauss-Newton method: case study using MATAB and Excel.	2
Le6	Fitting model, chi-square test, Kolmogorov-Smirnov test, Grubb test: case study using Origin and MATLAB.	2
Le7	Statistical hypothesis testing, normal distribution, t-Student distribution, ANOVA: case study using Origin and Excel.	2
Le8	Response surface method, Box-Benhken method: case study using MATLAB.	1
	Total hours	15

### TEACHING TOOLS USED

N1	Presentation.
N2	Computer presentation.
N3	Student's self study.
N4	Consultation.

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER  
COMPETENCES**

11. Principles of organic chemistry, theoretical and practical.
12. Knowledge in the field of basis of analytical chemistry, theoretical and practical.

**SUBJECT OBJECTIVES**

C1	Acquaintance with the knowledge on the distribution of medicinal products and medical devices on basic groups, according to their mechanism of action on the human body.
C2	Expanding the knowledge on methods of the preparation of biologically active substances, taking into account the modern trends in pharmacotherapy.
C3	Acquaintance with issues of the elementary production processes units in the area of pharmaceutical technology and biopharmacy.
C4	Gaining the knowledge on the technology of receiving of various forms of medicines and medical devices.
C5	Acquaintance with the generally applicable operating in the pharmaceutical industry and related sectors quality standards, concerning the manufacturing process and the final product, including the ways of managing waste.

***SUBJECT EDUCATIONAL EFFECTS***

**Relating to knowledge:**

Student, who has completed the course:

PEK\_W01 – has knowledge on the distribution of medicines and medical products on the basic groups, according to their mechanism of action on the human body,

PEK\_W02 – has knowledge on the methods of obtaining biologically active substances, taking into account the modern trends in pharmacotherapy,

PEK\_W03 – has knowledge on the elementary production processes units in the area of pharmaceutical technology and biopharmacy.

PEK\_W04 – can define the various forms of medicines and medical devices, and has knowledge on the technology of receiving them,

PEK\_W05 – has knowledge on the generally applicable operating in the pharmaceutical industry and related sectors quality standards, concerning the manufacturing

process and the final product.

**Relating to skills:**

Student, who has completed the course:

PEK\_U01 – has skills in the preparation of a simple pharmaceutical formulation, i. e. liquid type, ointment type,

PEK\_U02 – can to perform a qualitative analysis of pharmaceuticals and their biologically active components, using physical and chemical methods,

PEK\_U03 – has skills in extraction of a biologically active compound from a pharmaceutical formulation, is able to determine its amount using basic analytical methods, while maintaining for analysis the principles of proper samples preparation, precision and repetition in measurements and proper interpretation of the results, taking into account the measurement errors,

PEK\_U04 – has the ability to analyze biologically active compounds, which are main ingredients of pharmaceuticals and biopharmaceuticals, using spectroscopic methods, such as FT-IR, UV-Vis and NMR,

PEK\_U05 – has skills in the interpretation of the results of analyzes, and the preparation of a laboratory report in accordance with the principles of good laboratory practice (GLP).

**PROGRAMME CONTENT**

<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1	Pharmacokinetic and pharmacodynamic basis for the use of medicines and medical products, place of administration, availability and biological equivalence.	2
Lec 2	The division of pharmaceuticals and biopharmaceuticals due to disorders.	2
Lec 3	Methods of receiving biologically active substances, possible sources of raw materials for isolation of them. Adjuvants and preservatives.	2
Lec 4	The elementary processes and operations in production of pharmaceuticals, biopharmaceuticals and medical products.	2
Lec 5	Liquid and aerosol forms of pharmaceuticals and biopharmaceuticals.	2

Lec 6	Semi-solid forms of pharmaceuticals and biopharmaceuticals - gels and emulsions.	2
Lec 7	Semi-solid forms of pharmaceuticals and biopharmaceuticals – ointments and pastes.	2
Lec 8	Solid forms of medicines - granules, tablets and pellets.	2
Lec 9	Solid forms of medicines – capsules and nanoforms.	2
Lec 10	The solid forms of medicines - controlled release forms. Slices.	2
Lec 11	Herbal medicines. Dietary supplements. Medical special purposes.	2
Lec 12	Future pharmaceuticals and biopharmaceuticals – the modern trends.	2
Lec 13	Medications used in wound care.	2
Lec 14	Packaging requirements, specifications of the type and form.	2
Lec 15	Quality control in the manufacturing process. Pharmaceutical product quality.	2
	Total hours	<b>30</b>

<b>Form of classes - laboratory</b>		Number of hours
Lab 1	Safety rules in the laboratory of chemistry, good laboratory practice (GLP) and the rules of the reports preparation.	2
Lab 2	Ointment with calendula extract – the biopharmaceutical preparation.	4
Lab 3	Unguentum undecylenicum ointment – extraction of the biologically active compounds and their analysis.	4
Lab 4	Rivanol liquid – the medical product preparation, analysis of the main compound.	4
Lab 5	Ibuprofen suspension – viscosity analysis of the formulation, extraction of the main compound and analysis of it.	4
Lab 6	Pyralgin tablet – analysis without isolation of the main compound.	4
Lab 7	Echinapur bolus – analysis basis on biologically active compound equivalent (CE) calibration curve.	4

Lab 8	Repeating of the not successful realized experiments. Consultation of the reports results.	4
	Total hours	<b>30</b>

<b>TEACHING TOOLS USED</b>	
N1	Lecture with multimedial presentation.
N2	Experiment realizing.
N3	Report preparation.

<b>EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT</b>		
<b>Evaluation</b>	Educational effect number	Way of evaluating educational effect achievement
F – forming (during semester), C – concluding (at semester end)		
<b>C</b>	PEK_W01– W05	The final note which is the examination note verifying student’s knowledge.
<b>F (laboratory)</b>	PEK_U01 – U05	Average note of 6 grades of 6 completed reports, containing result, calculations and conclusions, prepared according to good laboratory practice rules (GLP).

**SUBJECT OBJECTIVES**

C1 To acquaint students with specificity of philosophical reflection about science and technology.

C2 Systematize and deepen the knowledge of the basic methods of inference that regulate and organize our knowledge.

C3 Performance considerations of engineer's activity and to present the issue of social responsibility in science and technology.

**SUBJECT EDUCATIONAL EFFECTS**

Relating to knowledge:

PEK\_HUM W07 The student gains knowledge of the basic methods of inference (deduction, induction and abduction).

PEK\_HUM W08 The student has knowledge that is essential to understanding and interpreting social and philosophical considerations of engineer's activity.

Relating to social competences:

PEK\_HUM K01 The student is aware of the importance of understanding non-technical aspects and of engineer's activity, its consequences and responsibility for undertaken

decisions.

**PROGRAMME CONTENT**

<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1,2	What is the science and technology? The basic concepts and principles of the philosophy of science and philosophy of technology.	2
Lec 3	The main criteria of scientific knowledge.	1
Lec 4	The tradition of doing science from the point of view of the theory	1
Lec 5	The tradition of doing science from the point of view of the experiment.	1
Lec 6	The basic methods of inference – induction.	1
Lec 7	The basic methods of inference – deduction.	1
Lec 8	The basic methods of inference – abduction.	1
Lec 9,10	The main objectives and functions of science and technology from the point of view of classical philosophy of science.	2
Lec 11	The main aims and functions of science and technology from the point of view of the sociology of scientific knowledge.	1
Lec 12, 13	The concept of science laboratory.	2
Lec 14, 15	The problem of social responsibility of science and technology.	2

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Basic knowledge of inorganic, organic and physical chemistry at 1<sup>st</sup> level of studies.
2. Basic knowledge in the area of polymers and plastics.
3. Ability to use original chemical literature and look through available electronic resources.

**SUBJECT OBJECTIVES**

- C1 Acquaint students with the significance of polymer additives and their influence on plastics properties.
- C2 Introducing the categorization of polymer additives.
- C3 Widening the knowledge about the latest trends in polymer additives industry.

### SUBJECT EDUCATIONAL EFFECTS

**Relating to knowledge:**

Any person who has got a credit of the subject:

PEK\_W01 – has gained knowledge of structure and techniques of various polymers (synthetic and natural) synthesis and modification.

PEK\_W02 – has basic knowledge of choice and application of polymer additives.

PEK\_W03 – knows relations between the type of additives and plastics properties.

PEK\_W04 – is capable of developing the plastics properties and extrapolation of applications for particular polymer composition.

PEK\_W05 – understands ecological and economic fallout of polymers and plastics applications.

### PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Introduction to synthetic polymers.	2
Lec 2	Introduction to natural polymers.	2
Lec 3	Techniques of synthetic polymer synthesis – polymerization additives.	2
Lec 4	Copolymerization and polymer crosslinking.	2
Lec 5	Techniques of natural polymer synthesis – possibilities of targeting the syntheses for industrial purposes.	2
Lec 6	Introduction to processing of plastics – processing aids.	2
Lec 7	Functional additives.	2
Lec 8	Polymers properties stabilizers.	2
Lec 9	Modifiers of functional properties of polymers.	2
Lec 10	Preparation methods for polymers with additives.	2
Lec 11	Polymers for medicine – requirements and examples of applied additives.	2
Lec 12	The problems and hazards involved in application of polymer additives.	2
Lec 13	Possible ways of polymers degradation, problems of recycling and polymer wastes.	2
Lec 14	Polymer additives producers.	2
Lec 15	Forum to discuss the latest trends in polymer additives.	2
	Total hours	<b>30</b>

### TEACHING TOOLS USED

- N1. Expository lecture.
- N2. Multimedia presentation.
- N3. Interactive lecture - problem solving.

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Knowledge of physical chemistry: kinetics of complex chemical reactions, chemical equilibrium, thermodynamic functions
2. Basic knowledge of differential and integral calculus

**SUBJECT OBJECTIVES**

- C1 To familiarize students with mathematical models of complex chemical processes
- C2 To familiarize students with the goals of modeling: simulation, optimization and controlling
- C3 Learning how to formulate and solve easy optimization problems

### SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

The person who passed course

PEK\_W01 has a basic knowledge about models of chemical reaction processes

PEK\_W02 knows examples of application of modeling in process simulation and Optimization

PEK\_W03 has a basic knowledge about regressions analysis and optimization methods

relating to skills:

PEK\_U01 is able to apply regression analysis in modeling of chemical reaction

PEK\_U02 is able to simulate numerically the operation of chemical reactor

PEK\_U03 is able to formulate and solve the task of optimizing the operating conditions of the reactor

### PROGRAMME CONTENT

<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1	Process modeling: physical object-mathematical model; illustrations with examples of processes running in chemical reactors.	2
Lec 2	Application of modeling. Simulation, optimization, control. The structure of the task: the process equations, boundary conditions, a steady state, the criterion (optimization), examples of solving methods.	2
Lec 3	Process simulation: plug flow reactor (PFR) with reversible and exothermic reaction. Calculation of concentration and conversion under adiabatic or isothermal condition.	2
Lec 4	Optimizing production costs: processes with without recycling of unreacted raw materials.	2
Lec 5	Process optimization: optimum temperature profile, reversible and exothermic reaction, plug flow reactor, method of the calculus of variations.	2
Lec 6	Process optimization: selection of optimum temperature and optimum conversion for reversible and exothermic reaction in series of CSTR.	2
Lec 7	Example of process control with the feedback controller for three CSTR in series.	2
Lec 8	Written credit	1
	Total hours	15
<b>Form of classes - laboratory</b>		<b>Number of hours</b>
Lab 1	Regression analysis in modeling the kinetics of chemical reactions; reaction order	2
Lab 2	Regression analysis in modeling the kinetics of chemical reactions; rate data analysis	2
Lab 3	Gas phase reaction with variable volume at constant pressure (PFR) and with the constant volume and variable of pressure (BATCH)	2
Lab 4	Procedures for numerical integration (rectangular, trapezoidal and Simpson methods) and numerical differentiation supported	2

	by experimental data (CSTR, PFR)	
Lab 5	Operation of CSTR in series: simulation of different type of complex reaction	2
Lab 6	Determination of the optimal temperature profile for different type reaction carried out in plug flow reactor (PFR)	2
Lab 7	Determination of the optimal temperature profile for different type reaction carried out in single CSTR	2
Lab 8	Comparison of reactors production efficiency (CSTR, BATCH) for selected industrial reactions	2
Lab 9	Simulation of the PFR adiabatic reactor: gas phase reaction, impact of inerts, $\Delta H(T)$ and $C_p(T)$ dependence	2
Lab 10	Simulation of the PFR reactor under isothermal, adiabatic and non-adiabatic conditions	2
Lab 11	Simulation of the CSTR reactor (and series) under isothermal, adiabatic and non-adiabatic conditions	2
Lab 12	Simulation of the BATCH reactor under adiabatic conditions	2
Lab 13	Simulation of the Packed Bed Reactor under adiabatic and non-adiabatic conditions (the heat losses; the influence of steam as the thermal buffer)	2
Lab 14	Simulation of the PFR with endothermic reaction under adiabatic and non-adiabatic conditions by external heating	2
Lab 15	Written credit	2
	Total hours	30

### TEACHING TOOLS USED

N1.Lecture with a multimedia presentation  
N2.Using the Excel + Solver software  
N3.Using the Polymath software

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

13. Chemical technology
14. Chemical engineering
15. Technological project

**SUBJECT OBJECTIVES**

C1	Providing the students with main tasks in industrial plants design and analysis of investment feasibility, rules of elaboration of process project of the plant.
C2	Acquiring fundamental knowledge about the systems delivering raw materials and energy, about preparing process data for design, about requirements concerning quality of raw materials and the products.
C3	Providing the students with rules of elaboration of production process course in designed industrial plant, including the rules of general scheme preparation and making technological-equipment scheme in a process project.
C4	Providing the students with the selection rules of process equipment, instruments, constructional materials, selection method of measurement and control instruments in a designed plant.
C5	Presentation of correct estimation of investment costs and calculation of exploitation costs of the designed plant.

***SUBJECT EDUCATIONAL EFFECTS***

**Relating to knowledge:**

PEK\_W01 – Knows the design rules for industrial plants, knows the rules for process project elaboration and making the analysis of investment feasibility,

PEK\_W02 – Knows the systems delivering raw materials and energy, can make analysis and prepare process data necessary for design, has the knowledge about quality requirements of raw materials and manufactured products, as well as about requirements concerning their storage,

PEK\_W03 – Can elaborate production process course in the designed plant,

PEK\_W04 – Knows selection rules of process apparatuses, equipment, adjustment of constructional materials and providing the designed plant in measurement and control instruments,

PEK\_W05 – Knows how to estimate the investment costs and how to calculate operational costs.

**PROGRAMME CONTENT**

<b>Form of classes – lecture</b>		<b>Number of hours</b>
Lec 1	Industrial plant. Design rules of industrial plants. Analysis of investment feasibility.	2
Lec 2	Technological-economical assumptions. Elaboration rules of the process project of industrial plant. Design assumptions.	2
Lec 3	Systems delivering raw materials and energy. Products, wastes. Environment protection.	2
Lec 4	Process data. Quality of raw materials and products, guidelines for their storage. Production process course. General scheme of industrial plant.	2
Lec 5	Process equipment, apparatuses of industrial plant. Selection of constructional materials.	2
Lec 6	Control and adjustment of the designed plant. Measurement and control instruments, systems of automatic control.	2
Lec 7	Elaboration of technological-equipment scheme of the industrial plant. Spatial distribution of equipment items and apparatuses.	2
Lec 8	Investment costs and production costs calculation.	1
Total hours		<b>15</b>

**TEACHING TOOLS USED**

N1	Lecture with multimedia presentation.

Subject code	<b>TCC024016</b>
Group of courses	<b>NO</b>

\*delete as applicable

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)	15			15	
Number of hours of total student workload (CNPS)	60			30	
Form of crediting	Examination			Crediting with grade	
For group of courses mark (X) final course					
Number of ECTS points	2			1	
including number of ECTS points for practical (P) classes				1	
including number of ECTS points for direct teacher-student contact (BK) classes	1			1	

\*delete as applicable

<b>SUBJECT OBJECTIVES</b>	
C1	Introducing students to the basic terminology, concepts and definitions of quality management and tools for its improvement.
C2	Presentation of issues concerning the concept of Sustainable Development, Green Chemistry, environmental programs and the impact of the product/technology/process on the environment.
C3	Acquire basic knowledge about organization and management of the production process
C4	Understanding the nature and role of formation quality management in the production process and implementation of quality control of every stage of it.
C5	Acquire basic knowledge about the product, its life cycle and an efficient system of production management - from raw materials to final product.
C6	Knowledge about the importance of product quality and role of brand in marketing
C7	Presentation of issues concerning the development of sustainable technologies and applied in practice management systems of quality.
C8	Understanding the nature and role of quality management in the production process and elaboration of basic documents on the subject.

<b>SUBJECT EDUCATIONAL EFFECTS</b>	
<b>Relating to knowledge:</b>	
The person who passed subject:	
PEK_W01 – knows the key concepts and definitions of quality and has sufficient knowledge of the basic principles of quality management in chemical enterprise	
PEK_W02 – has the knowledge and can describe the Quality Management System in accordance with ISO 9000, knows basic documentation in this area and knows how to use the tools of quality improvement	
PEK_W03 – has knowledge of Sustainable Development, Green Chemistry and the documents relating to global sustainable development policy, knows environmental programs	
PEK_W04 – knows the key concepts and issues in the field of production management and organization of the production system	

PEK\_W05 – has knowledge of the product, its life cycle, knows the scope of producer responsibility for the product and has a information about the continuous improvement of product quality and productivity of manufacturing processes

PEK\_W06 – has the informations about the improvement of technological processes and audit of technology management as well as the continuous improvement of products and productivity of manufacturing processes in accordance with modern production management system

PEK\_W07 - has knowledge of the marketing aspects of the product quality formation

**Relating to skills:**

The person who passed subject:

PEK\_U01 – is able to put into practice the knowledge of production quality management and organization of the production system

PEK\_U02 – has the ability to assess the quality of products and services and customer needs analysis

PEK\_U03 – has the knowledge and skills in the use of selected quality tools and assessing the ability of production process

PEK\_U04 – has the knowledge and knows how to use it in the implementation of quality management systems and knows the basic documentation on the subject

<b>PROGRAMME CONTENT</b>		
<b>Form of classes - lecture</b>		<b>Number of hours</b>
Lec 1	<i>Quality, origin, basic concepts and definitions</i>	1
Lec 2	<i>Quality Management Systems - Standards ISO series 9000</i>	2
Lec 3	<i>Principles of Sustainable Development, EMAS, environmental programs, "Responsible and Care", Cleaner Production, Cleaner Technology, Green Chemistry</i>	2
Lec 4	<i>Techniques and methods for improving the quality</i>	2
Lec 5	<i>Organization and management of the production process</i>	2
Lec 6	<i>Product - the product life cycle</i>	2
Lec 7	<i>Lean Manufacturing, Benchmarking, Controlling, Kaizen</i>	2
Lec 8	<i>Marketing aspects of product quality, Brand and its position on the market</i>	2

	Total hours	<b>15</b>
--	-------------	-----------

<b>Form of classes - project</b>		<b>Number of hours</b>
Proj 1	<i>Introduction, organization, discuss the range of activities</i>	1
Proj 2	<i>Structure of the Quality Manual in accordance with the principles of ISO 9001 regarding the supervision of documentation</i>	2
Proj 3	<i>Product Selection, features, standards, requirements, the program of the production process progress and planning of production capacity</i>	2
Proj 4	<i>Market analysis and marketing aspects of quality, location planning and assessment of project impact on the environment</i>	2
Proj 5	<i>Tools and methods for the improvement of quality - exercises</i>	2
Proj 6	<i>Presentation of the Quality Manual including proposed product technology</i>	2
Proj 7	<i>Presentation of the Quality Manual including proposed product technology</i>	2
Proj 8	<i>Presentation of the Quality Manual including proposed product technology</i>	2
	Total hours	<b>15</b>

<b>TEACHING TOOLS USED</b>	
N1	lecture with a multimedia presentation
N2	individual preparation and multimedia presentation

<b>EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT</b>		
<b>Evaluation</b>	Educational effect number	Way of evaluating educational effect achievement
F – forming (during semester), C – concluding (at semester end)		
C1 (Lecture)	PEK_W01 – PEK_W07	Exam

F1 (Project)	PEK_U01- PEK_U04	Concept elaboration of the new product + multimedia presentation of the Quality Manual for the technology of proposed product

### PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Knowledge of English language (B2 level).
2. The knowledge of organic and inorganic chemistry.
3. The knowledge of physical chemistry.

### SUBJECT OBJECTIVES

- C1 To acquaint the student with basic concept of heterogeneous catalysis.
- C2 To familiarize the student with phenomena occurring on catalyst surface.
- C3 To enable the student with different methods of catalyst preparation and ways of its characterization.
- C4 To acquaint the student with application of heterogeneous catalysis in environmental protection and fine chemicals production.

### SUBJECT EDUCATIONAL EFFECTS

relating to knowledge:

- PEK\_W01 The student knows the fundamental definitions used in heterogeneous catalysis.
- PEK\_W02 The student understands the surface phenomena occurring on the catalyst during reaction.
- PEK\_W03 The student understands the mechanisms of catalytic reaction.
- PEK\_W04 The student knows the methods of catalysts preparation and their characterization.
- PEK\_W05 The student knows the main problems occurring during catalytic processes linked to catalyst deactivation.
- PEK\_W06 The student can describe popular types of catalysts and reactions used for fine chemicals production and environmental protection.
- PEK\_W07 The student can describe basic catalytic processes used for fine chemicals production and environmental protection.

relating to skills:

- PEK\_U01 The student can synthesize solid catalyst on the grounds of literature data.
- PEK\_U02 The student is able to carry out the catalytic test of hydrocarbon steam reforming and desulfurization, calculate the conversion, selectivity and yields of reaction products.
- PEK\_U03 The student knows how to calculate the rate of catalytic reaction and activation energy.
- PEK\_U04 The student can determine the chemical composition of catalyst and describe its structure features on the basis of results of its characterization.

relating to social competences:

- PEK\_K01  
PEK\_K02

### PROGRAMME CONTENT

Form of classes - lecture		Number of hours
Lec 1	Catalysis and catalyst - introduction. The significance of catalysis in everyday life. Catalysis in industry. Description of types of catalysis. Definitions of conversion, selectivity, activity, yield, turnover frequency.	2
Lec 2	Thermodynamics and kinetics of catalytic reaction. Activation energy, equilibrium constant, rate constant, reaction order.	4
Lec 3	Reaction steps in heterogeneous catalysis. active sites, reaction mechanism (Eley-Rideal, Langmuir-Hinshelwood).	2
Lec 4	Adsorption process. Types of adsorption. Energy of adsorption. The significance of surface structure of the catalyst for adsorption process.	2
Lec 5	Crystallographic structure of metals and metal oxides. Classification of crystal imperfections and their impact on catalyst activity.	2

Lec 6	Active sites. Crystallography of active sites, geometrical factor, saturation of active sites. The acid-base character of catalyst surface. Electronic properties of active sites. Bifunctional catalysts.	4
Lec 7	Preparation of solid catalysts. Description of sol-gel method, impregnation, precipitation and co-precipitation. Supported catalyst.	2
Lec 8	Characterization of solid catalyst. Surface structure and chemical composition of catalysts - description of methods and procedures of solid catalysts characterization.	4
Lec 9	Catalyst deactivation. Poisoning, formation of deposits, thermal degradation. Prevention of catalyst deactivation. Catalyst regeneration.	2
Lec 10	Catalysis in environmental protection. Desulfurization, reduction of NO <sub>x</sub> , methane reforming, VOC's oxidation.	2
Lec 11	The role of catalysis in fine chemicals production. Basic information about the fine chemicals industry. Application of heterogeneous catalysis in fine chemicals production, catalysis for improving production processes, description of the most important processes.	4
	Total hours	
<b>Form of classes - laboratory</b>		<b>Number of hours</b>
Lab 1	Preparation of solid catalyst.	4
Lab 2	Preparation of solid catalyst.	4
Lab 3	Determination of acidic and basic active sites of the catalyst.	4
Lab 4	Determination of catalyst chemical composition and structural morphology on the basis of results of its characterization (XRD, XPS, TEM, Sbet of 5 different catalysts).	4
Lab 5	Determination of surface species by infrared spectroscopy.	2
Lab 6	Catalytic steam reforming of hydrocarbons.	4
Lab 7	Catalytic desulfurization.	4
Lab 8	Excursion to BASF.	4
	Total hours	30
<b>TEACHING TOOLS USED</b>		
<p>N1. Lecture with a multimedia presentation.  N2. Executive instructions for laboratory classes.  N3. Laboratory classes carried out with the use of research facilities.  N4. Excursion.</p>		

## EVALUATION OF SUBJECT EDUCATIONAL EFFECTS ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end))	Educational effect number	Way of evaluating educational effect achievement
F1 (lecture)	PEK_W01 - PEK_W07	Exam.
F2 (laboratory)	PEK_U01 - PEK_U04	Report of the laboratory exercise.

**PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES**

1. Basic Chemistry
2. General knowledge on Chemical Technology
- 3.

**SUBJECT OBJECTIVES**

C1 To provide students with a general knowledge of sustainability concept  
 C2 To provide student with a knowledge on sustainable technology and sustainability related to Chemistry and Chemical Technology

**SUBJECT EDUCATIONAL EFFECTS**

relating to knowledge:

PEK\_W01– trainees will have a general knowledge of sustainability

PEK\_W02 – student will have specialized knowledge on sustainability related to chemistry and chemical technology

PEK\_W03 – student will be able to solve specific problems concerning sustainability in chemistry and chemical technology

**PROGRAMME CONTENT**

Form of classes - lecture	Number of hours
---------------------------	-----------------

Lec 1	Introduction to sustainable development (SD) – concepts, principles, definitions, models	1
Lec 2	A role of sustainability in biotechnology and chemical industry – the pollution prevention in chemical industry, the design and modeling of the sustainable manufacturing and industrial processes, conservation and management of resources	2
Lec 3	Sustainable development in chemistry and chemical technology – some aspects of sustainability using case studies	10
Lec 4	Environmental sustainability, Zero emission concept, Cleaner Production concept	1
Lec 5	The challenges of sustainable development	1
	Total hours	15
